DOMAIN

On the World Wide Web your domain name is your own unique identity (such as .com .net .org .info .edu.bd .co .in .co.in .biz .tv .mobi etc.) No two parties can ever hold the same domain name simultaneously; therefore your Internet identity is totally unique. If you have a business site on the Internet your domain name is your own online brand and in a sense you can use your domain name as your online business card. With your own domain name your web site and e-mail addresses for example will have that professional look, being unique to your business.

WEB HOSTING

Our web hosting service is a type of Internet Hosting Service that allows our clients organizations to make their website accessible via the World Wide Web. We provide space on our owned server for use by clients, as well as provide Internet connectivity, typically in our Data Center.

OTHER FEATURES

▶ 24*7 Technical Support
▶ Enhanced cPanel
▶ 99.9 % Hosting Uptime
▶ Central Firewall Facility
▶ Daily Automatic Backup
▶ Auto SSL facility

* We offer several Hosting packages as per customer requirements

SERVER SPECIFICATION

Dell PowerEdge R730, 2x Intel Xeon E5-2620 V3 2.4 Ghz 15M, 8X 8GB DIMM, 2133MT, 4X600Gb 15K RPM SAS.

MONTHLY DATA TRANSFER
This Plan is equipped with 100 GB of Monthly Data Transfer which is more than sufficient for visitors of your website.

DISK SPACE STORAGE
Disk space depends on the type of website you have. We provide you 50 GB of Storage space to suit your business needs.

CPU PERFORMANCE
In order to handle multiple site access requests, a 100Mhz CPU is provided to host for your website to avoid any hassle.

WEB CONTROL PANEL
CPanel is the first-class support and rich feature control panel that has been the most reliable and intuitive since 1997.

SSL CERTIFICATE

SSL certificates keep online interactions private even though they travel across the public Internet. They also help customers gain the certificates to transact with your web site. The right SSL certificate depends on the level of assurance your customers need and the minimum level of encryption your organization requires.

WHAT IS SSL?

An SSL certificate is a bit of code on your web server that provides security for online communications. When a web browser contacts your secured web site, the SSL certificate enables an encrypted connection. It's kind of like sealing a letter in an envelope before sending it through the mail. SSL certificates also inspire trust because each SSL certificate contains identification information. When you request an SSL certificate, a third party (such as Thawte, Symantec, GeoTrust) varies your organization's information and issues a unique certificate to you with that information. This is known as the authentication process.

SSL IS IDEAL FOR

• Banking or Financial institute.
• Academic Institution
• E-commerce sites.
• Any site looking to protect its brand
• Any site that is likely to be the target of phishing scam
• Any site that that wants a competitive advantage

HOW SSL WORKS

When an Internet user visits a secure web site, an SSL certificate provides identi¬fication information about the web server and establishes an encrypted connection. This process happens in a fraction of a second.

TRAIN UP YOURSELF, PROVE YOUR EMPLOYABILITY

Daffodil Online Ltd. Offers various IT educations and Training courses with certification through the practical environment of our own highly equipped data center, well furnished Computer lab and internal standard VUE Testing Center so that scholars can relate their education with practical experience. Our offered Training courses include:

SL	COURSE NAME	DURATION	QUALIFICATION/ REQUIREMENT
01	ISP Setup, Administration and Configuration with Linux	48 hours	SSC/ Equivalent
02	ISP Setup, Administration and Configuration with Mikro-Tik	18 hours	SSC/ Equivalent
03	Cisco Switch & Wi-Fi Router Configuration	12 hours	SSC/ Equivalent
04	Cambium Certified Wireless Engineer	40 hours	SSC/ Equivalent

We offer all 4 courses together

BENEFITS OF THE COURSE

- 100% hands-on
- Understanding Basic Network Communication
- Identifying Network Hardware
- Understanding OSI Layer
- Concepts about Data Link Layer Protocols, Understanding Network Layer Protocols and IP Addresses
- Understanding TCP/IP protocol
- Configuring and Troubleshooting Linux OS booting
- Administering File sharing Server (NFS,SAMBA,FTP)
- Configuring Web Server, Name Server, Proxy Server and Mail Server
- Configuring Linux Gateway
- Securing your communication (ssh, open ssl)
- Monitoring your system
- Routing
- Load Balancing
- Tunnels and VPN
- Bridging
- Bandwidth Management
- Caching Server
- Router and Network Administration
- Firewall
- Hotspot

WEB BASED BULK SMS SOLUTION

Bulk SMS is nowadays a popular way of communicating target market. Daffodil Online Limited provides web based text massaging service through SMTP technology. Organizations send text massage to their target audience and also get delivery report to make sure whether the massage is delivered or not. This is one of the cheapest ways of promoting organization's offering and reaching necessary information to the customers.

FACILITIES

- Marketing For organization
- Cheaper way of communication
- Getting delivery report
- Communicating Maximum target audience by a single click
- Using own company name
- Help Branding

COLOCATION

Daffodil Online Ltd colocation services help you safeguard mission-critical data with the highest levels of security and operational reliability. DOL data centers provide access to vital ecosystems where major networks, enterprises and business partners interconnect to each other.

- Reliability-DOL data centers is equipped with full UPS power, back-up systems and N+1 (or greater) redundancy, with a proven, industry-leading >99.9999% uptime record.
- Power Density-with robust heating, ventilation and air conditioning (HVAC) systems, DOL data centers exceed the requirements of even the most power-hungry deployments.
- Security-our data center utilizes an array of security equipment, techniques and procedures to control, monitor, and record access to the facility, including individual cages.
- Recovery-Space provides operations centers and storage space when you need it; DOL offers 24-hour access to qualified technical support-with DOL, you can maintain your mission-critical operations and equipment under any circumstances.

POWER:

Daffodil Online Limited (DOL) has designed and developed its power infrastructure with Bangladesh's power situation in mind. Considering the environment the facility has N+N backup diesel generators, N+N power distribution cabling from the generators to the power distribution board and N+N online UPS. In addition to reliable backup power we insure clean power starting from five separate earthling systems with resistance levels of below 0.5 ohm each.

REGULATED TEMPERATURE

The facility is equipped with the world's first precision air-conditioning system that considers heat load in computer rooms and seasonally varying ambient temperatures. This German system selects the optimal operation mode to maintain the data centre temperature within ± 2°C whilst maintaining humidity within ± 5%. In addition the precision A/C system is energy efficient and environmental friendly by using R134a refrigerant that is not harmful to our environment and becoming the industry standard. Lastly, the precision A/C is deployed in an N+1 configuration.

SAFETY SECURITY

DOL has deployed industry leading security systems that are strategically installed and need to be passed to enter the data centre, the Network Operations Centre (NOC) and the Data centre floor. In addition a Man-trap and surveillance systems are incorporated to further control monitor movement of personal. VESDA (Very Early Smoke Detection Apparatus) and environmentally friendly FM200 fire suppression systems are installed throughout the Data Centre floor and the Power Room.

FACILITIES MANAGEMENT:

From Daffodil Online Network Operations Centre (NOC) various environmental aspects of the facility including power (UPS & Generators), cooling, fire suppression and security are monitored and controlled by a central environment monitoring and controlling system. The NOC is manned 24x7x365. In addition we maintain aggressive SLA (Service Level Agreement) with all our vendors.
